## THE OPPORTUNITY

Local pump track design and build expertise does not exist.

Now you can purchase a pump track that delivers a world class riding experience.

A turnkey product with the magic built in - known outcome, cost and delivery.

A generator of community good will and positive feedback.

Let them ride with confidence, develop skills, be challenged and experience the flow state.

## FEATURES

Perfect geometry allows use by all wheels - skateboards, scooters and bikes.

Built tough for the extremes of the public space environment with high quality materials and hidden hardware.

Low maintenance product that can be repaired locally or a complete module replaced if required.

Prosocial activity for all ages including youth.

Track can be placed in one location permanently or moved between sites. Disassemble, travel, reassemble = 1 day. Parklife provides a moving service.

Grow track over time by purchasing new modules for a new track layout.

Lead time approximately 12 weeks manufacture + 12 weeks shipping.

“

An epic day down at the Eastern Viaduct, Urban Lab with the biggest turnout yet for the Community Pump Track. So many people arriving here by bike, now that they know there is another safe, active destination on the waterfront

”

Cam Perkins, Placemaker,  
Panuku Development

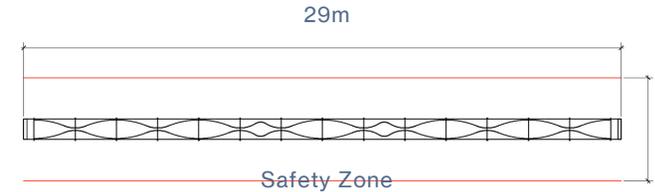

Pump Tracks by Parklife to date in NZ

16

## MP01 - RHYTHM STRAIGHT PUMP TRACK

Track Length.....	29 rideable metres or other lengths as required.
Structure.....	High quality, durable construction, European birch timber understructure with rubber feet.
Riding Surface.....	Proprietary reinforced composite riding surfacing.
Hardware.....	Concealed M10 stainless steel bolts.

### Project Example

#### Don Buck Primary School

Client: Don Buck Primary School  
 Location: Rotates around 4 schools  
 Referee: Olga Mills

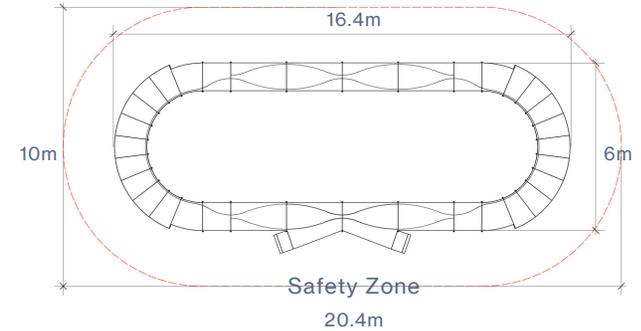

The track's value is in engaging kids who may not really be that keen to be at school - if they like coming to ride on the track, then the whole school experience is more positive."

Olga Mills, BOT

## MP02 - SPEED RING PUMP TRACK

Track Length.....	36 rideable metres.
Structure.....	High quality, durable construction, European birch timber understructure with rubber feet.
Riding Surface.....	Proprietary reinforced composite riding surfacing.
Hardware.....	Concealed M10 stainless steel bolts.

### Project Example

#### Te Puru Pump Track

Client: Thames District Council  
 Location: Te Puru, Thames  
 Referee: Ross Ashby

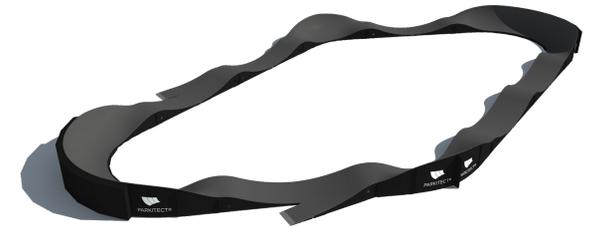

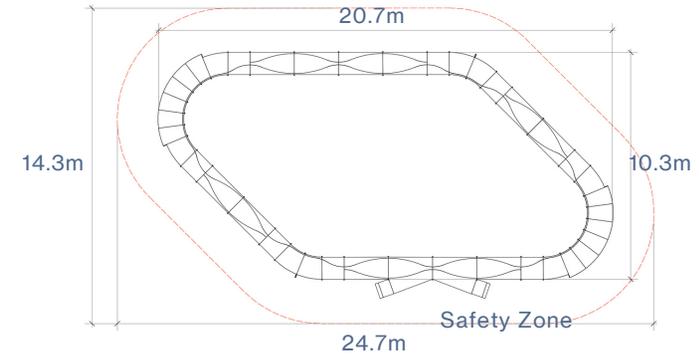

“  
 The feedback has been overwhelmingly positive. It's a big deal for a community like this to have this sort of facility, it is not something that happens very often.  
 ”

Ross Ashby,  
 Thames Coromandel District Council

## MP03 - QUADRAGON PUMP TRACK

Track Length.....	48 rideable metres.
Structure.....	High quality, durable construction, European birch timber understructure with rubber feet.
Riding Surface.....	Proprietary reinforced composite riding surfacing.
Hardware.....	Concealed M10 stainless steel bolts.

### Project Example

#### Shirley Pump Track

Client: Christchurch City Council  
 Location: Shirley, Christchurch  
 Referee: Will Rolton

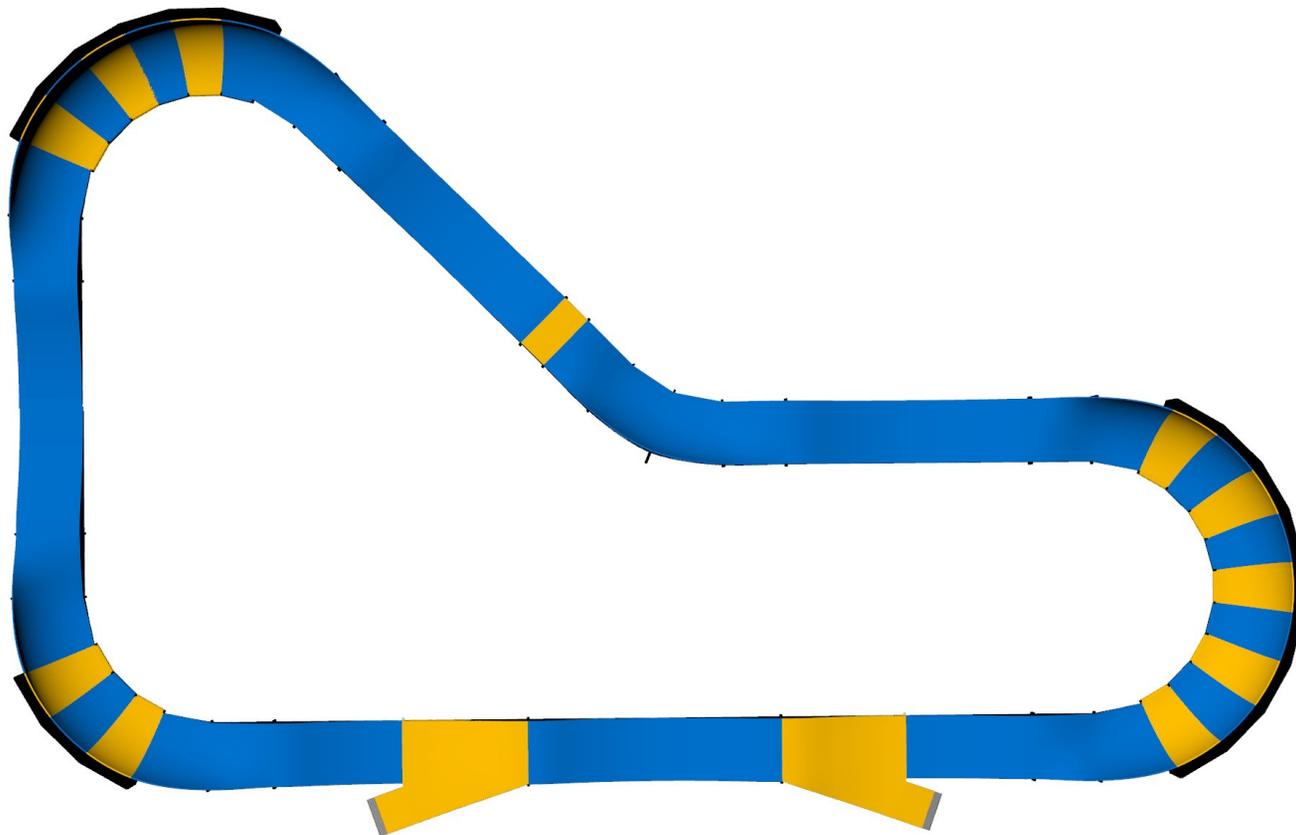

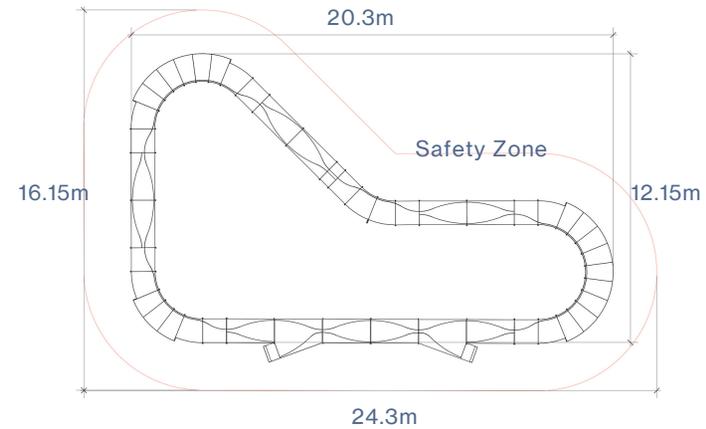

It's better than I could have imagined.

Shannon,  
 Local Boy campaigner for the track

## MP04 - RAUPO PUMP TRACK

Track Length.....	53 rideable metres.
Structure.....	High quality, durable construction, European birch timber understructure with rubber feet.
Riding Surface.....	Proprietary reinforced composite riding surfacing.
Hardware.....	Concealed bolts M10 stainless steel.

“

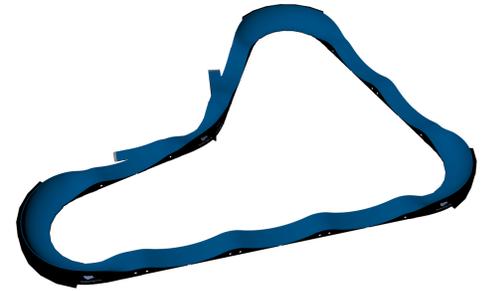

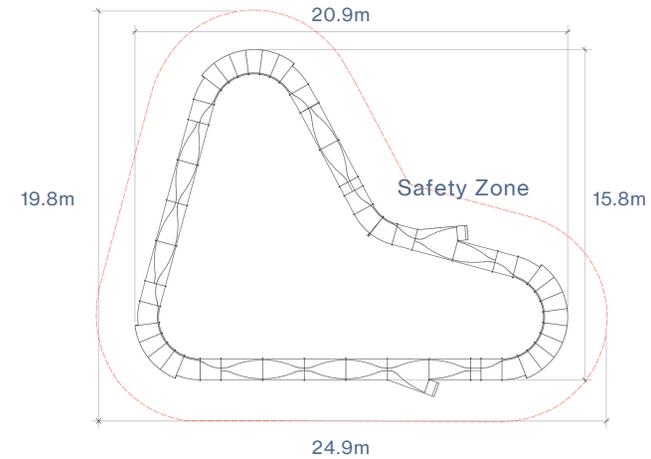

The track was so smooth and all the berms and rollers were perfect! The grip level in the berms is impressive, i'll be back.

Troy Brosnan,  
BMX Biker

”

## MP05 - KAPITI PUMP TRACK

Track Length.....	57 rideable metres.
Structure.....	High quality, durable construction, European birch timber understructure with rubber feet.
Riding Surface.....	Proprietary reinforced composite riding surfacing.
