and weather

## Precast Concrete

**The Precast Concrete Modular Pumtrack is the ultimate in design and long life low maintenance material for optimum riding safety and fun.**

Parkitect's 'Urban Edition' Modular Pumtrack system is made using reinforced Precast Concrete with proprietary geometry and sandblasted high-grip riding surface.

Tracks are assembled on a level foundation and then landscaped to suite the surrounding area. The precast concrete offers a low maintenance and long life pumtrack material suitable for all environments and sites, handling harsh weather and heavy use. Parkitect modules are ready for assembly, pre-engineered, designed and certified to guarantee the perfect riding geometry for a superior pump track experience.

The Urban Edition Modular Pumtrack is a patented product and complies with Australian & European Standard AS EN 14974:2021.

Precast Concrete Modular Pumtracks offer significant advantages over 'in situ' poured concrete or asphalt systems. Firstly, the aesthetic quality is outstanding. Each track is simple to purchase and ready to be assembled without significant earthworks or lengthy complicated and expensive project documentation. The design of this pump track is sleek, round and low to the ground. Plus it's 30% wider than our earlier modular pump track designs further improving safety.

The Modular Pumtrack design process is fast and free. This can save you thousands of dollars on consultation fees, not to mention the time you'll save on the design process.

The Urban Edition Modular Pumtrack system remains mobile throughout its lifetime. Tracks can be changed, upgraded or removed anytime. It really is the most environmentally friendly choice in pump track play equipment available worldwide.

- Complies to new standards AS EN14974:2021.
- Assembly by Playspace / Civil or Landscape contractors.
- Super cost effective - install around existing infrastructure & landscaping.
- Choose from standard track layouts or have a track designed just for you.
- Guaranteed geometry with every design. Pre-engineered and certified.
- Superior environmentally friendly choice.
- Easy to landscape. Outstanding aesthetic appeal.

# OUR MODULES

Sand blasted non-slip surface, sealed with impregnating sealer

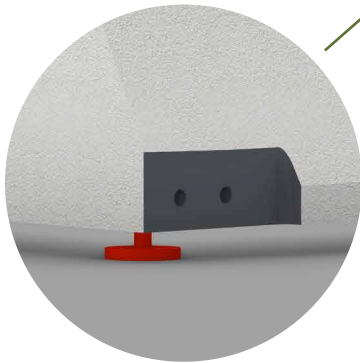

Sloped & solid side design for improved rider safety & easy landscaping

Large radius edge design for improved rider safety

Screw adjustable levelling feet for easy assembly

# THE PARKITECT DIFFERENCE

Guaranteed riding result with proven geometry

Aesthetically pleasing riding play-space for public areas

Proven track design for rider safety & enjoyment

# THE PARKITECT DIFFERENCE

Expertly pre-engineered  
& certified

Cost efficient riding  
activity solution

Resistant to vandalism  
and weather

## OUR MODULES T04 - Turn Part 4

A larger almost flat space is now  
included in all corner modules for  
improved rider confidence for  
young and novice riders

# OUR MODULES

## HB2 - High Bump 2

The new High Bump 2 module allows a 15 degree kick to be added to straight sections of track providing improved rider interest & flow

# THE PARKITECT DIFFERENCE

Guaranteed riding result  
with proven geometry

Aesthetically pleasing riding  
play-space for public areas

Proven track design for  
rider safety & enjoyment
